Objectives:
The objective of this course is to deliver the most current information on trauma and its management to healthcare professionals, especially those working to combat major health problems such as traumatic brain injury and difficult pain problems. It will highlight the benefits of Gift of Life, Life Flight and tranexamic acid. In addition to applying the clinical and education review points of each session, the course facilitates change in practice by offering trauma’s latest innovative strategies in emergent care for health care systems and communities.

Target audience
This course is intended for staff nurses, nurse managers and educators practicing in the area of trauma nursing and critical care, and pre-hospital providers.
