65th Annual Detroit Trauma Symposium

The Detroit Trauma Symposium is designed to address the continuum of care of the injured person. Presenters and attendees will represent physicians, nurses and allied health providers who work together to maintain the interdisciplinary cooperation, which is one hallmark of a coordinated system of trauma care. Attendees will gain knowledge about their own specialties as well as an increased knowledge and appreciation of the work of others on the trauma team.

Welcome from the Trauma Symposium Chairman

Dear Attendees:

Thank you for making the Detroit Trauma Symposium the largest, continuously running symposium on trauma medicine in the world. Thanks to you, this year we are celebrating our landmark 65th anniversary.

First, look at the speakers this year. I hope you agree it's another great lineup.

Second, consider the sunrise sessions. Your positive response to these opportunities made it a pleasure to schedule them again this year.

Thank you for coming. We are proud that the Detroit Trauma Symposium attracts not only distinguished trauma physicians but trauma nurses, surgery and emergency medicine residents, EMTs, allied health personnel, and medical students. The audience has continued to grow from the State of Michigan to nearly every state in the U.S. plus Canada.

We invite you to take advantage of networking opportunities throughout the symposium to connect with current and future colleagues from the great field of trauma medicine.

We always welcome your comments and suggestions. We use them every year to be responsive to your interests. Hopefully, we have improved. Please keep us in mind when you have ideas for future symposia.

Sincerely,

Lawrence N. Diebel, MD, FACS

*Professor, Wayne State University School of Medicine
Senior Trauma Surgeon, DMC Detroit Receiving Hospital
Chairman, Detroit Trauma Symposium Operations Committee*

About DMC Detroit Receiving Hospital and the Detroit Medical Center

Detroit Receiving Hospital is one of seven hospitals operated by the Detroit Medical Center (DMC). The 320-bed adult specialty hospital offers expertise in complex trauma, critical care, neuroscience and geriatrics. Detroit Receiving is Michigan's first Level 1 Trauma Center, offering the state's largest burn center, with a 24/7 hyperbaric oxygen therapy program. Its emergency department cares for more than 90,000 patients annually. In its affiliations with DMC and Wayne State University School of Medicine (WSU SOM), more than 95% of Detroit Receiving physicians serve on the faculty of the WSU SOM. As a teaching institution with a comprehensive medical residency program, almost 60% of emergency physicians practicing in Michigan received some of their training at Detroit Receiving Hospital.

About Wayne State University School of Medicine

Founded in 1868, the Wayne State University School of Medicine educates more than 1,000 medical students in all four classes. In addition to undergraduate medical education, the school offers master's degree, PhD and MD-PhD programs in 14 areas of basic science to about 400 students annually.

The school's ties to the community are strong. As the only medical school in Detroit, WSU has a stated mission to improve the overall health of the community. As part of this mission, the school has established, with the help of a \$6 million National Institutes of Health grant, the Center for Urban and African-American Health to seek new ways to redress health disparities by identifying preventive strategies and therapeutic approaches to chronic diseases that affect this population, namely obesity, cardiovascular disease and cancer. Perhaps the most significant contribution the school provides to the community is care to area residents who are under- or uninsured. Along with the Detroit Medical Center, WSU faculty physicians provide an average of \$150 million in uncompensated care annually.
