OVERVIEW

Trauma care is a team effort that extends far beyond the walls of a trauma center. This conference brings together healthcare professionals to explore critical issues across the continuum of trauma care. Participants will explore a dynamic lineup of expert speakers and compelling real-world cases addressing today's most critical challenges in trauma and emergency care. From human trafficking awareness and rural pre-hospital medicine to damage control orthopedics, stroke stabilization, mass casualty preparedness, and lessons learned from trauma patients and forensic investigations, this educational activity will provide practical insights for healthcare professionals across the trauma spectrum.

AUDIENCE

This activity is designed to meet the educational needs of physicians, advanced practice providers, nurses and EMS personnel involved in the care of the traumatically injured adult and pediatric patients.

Complimentary registration is supported by the ProMedica Toledo Hospital Foundation Marja Dooner Education Fund.

Registration is required.
